

The all-new Jaguar family of cutting plotters includes the Jaguar II series (JII-61, JII-101S and JII-132S), and Jaguar IV series (J4-61 ,J4-101S,J4-132S and J4-183S) . With intuitive features to meet the demands of today's professionals, the Jaguar series represents the apex of cutting plotter technology.

Features

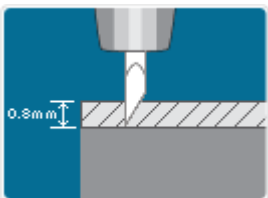

Enhanced AAS II Contour Cutting System

The Jaguar IV series features a standard Accu-Aligning System(AAS II) to guarantee precise contour cutting by detecting the registration marks on digitally produced images. The significant functions include :

Efficient Throughput

At up to 60 inches per second of cutting speed, Jaguar IV's cutting rate simply outperforms the competition.

600 Gram Cutting Force

Selectable cutting forces, ranging from 0 to 600g, accommodate a wide variety of materials, including fine and thin masking films to thick and hard reflective films.

Innovative Tangential Emulation Mode

The tangential emulation mode is able to perform clean cuttings, diminutive letterings and intricate graphics which yield smooth corners and sleek edges on thick materials.

User-Friendly Control Panel

The easy-to-use and multi-language control panel can remarkably simplify complex tasks. Available in 9 languages, including English, French, Italian, Spanish, Portuguese, Dutch, Japanese, Polish, Turkish it provides various functional settings to meet users' needs.

Media Handling System

The media handling system is fully adjustable. It handles media on standard cores and resolves media drifting and alignment problems to ensure better tracking.

Handy Grooved Cut Off Tool

This handy and innovative design helps you cut off a finished job in a straight line, reducing vinyl waste.

Windows Drivers

Jaguar includes a Windows driver that allows sign makers to edit signs from CorelDRAW and output directly to the Jaguar system. Easy-to-understand drivers make sign cutting with Jaguar simple.

Selective Pinch Roller Positioning

Each pinch roller can be positioned and operated individually, widening the Jaguar cutting plotter's range of applications.

Tri-port connectivity

Jaguar supports tri-port connectivity with USB, serial and parallel ports. USB port provides faster and convenient data transmission between computer and Jaguar. Tri-port connectivity provides sign makers a great flexibility for transmission data.

Ingenious Media Basket

Equipped with a unique media basket, Jaguar ingeniously keeps your vinyl off the floor and away from dust or contaminants. Your production will be a clean and efficient operation.
